

## REMARKS

The above amendments to the above-captioned application along with the following remarks are being submitted as a full and complete response to the Official Action dated March 24, 2003 and a telephone interview with the Examiner on December 16, 2003.

During the phone interview, the Examiner indicated all 112 issue were overcome by the propose amendments except that claim 16 cannot cover both nucleobase hybridization practice and protein practice due to the use of "hybridization" in claim 16 being only applicable to nucleobase practice and not protein practice. The Examiner suggested amending "hybridizing" into "binding" to cover protein. However, "binding" was never searched; such a change in the claims may trigger new prior art rejections. Applicants hereby cancel claim 22 to limit claim 16 to nucleobase hybridization practice, and file a continuation application concurrently to pursue a new set of claims regarding the protein practice.

In view of the above amendments and the following remarks, the Examiner is respectfully requested to give due reconsideration to this application, to indicate the allowability of the claims, and to pass this case to issue.

In addition, Applicants request the Examiner to acknowledge the receipt of the revised drawings for Figs. 1, 2C, 3, 7, 8C and 9 filed on February 14, 2002.
